

Not a polling station in sight

But your vote counts here more than anywhere.

Communities are working to keep Shell's coalbed methane drilling out of the Sacred Headwaters – the shared birthplace of the Skeena, Nass and Stikine Rivers. Which candidate will speak out in support of our wild salmon, grizzly bears and caribou? Who will protect our fishing and guide-outfitting industries from Shell's risky experiment?

On October 14, vote for the Sacred Headwaters.
